Put a face to your supplier from Denmark

Welcome to the 9th edition of the Who is Who handbook. This gives you insight into leading suppliers in the Marine and Cruise & Ferry industries in Denmark as well as upcoming events relating to these industries. With Who is Who you can put a face to your direct contact within the Blue Denmark.

Denmark is leading the way in global shipping

Since the '90s, the industry has focused on delivering green solutions combining quality, energy efficiency and reliability. Danish suppliers have been an important driver for change in these areas in the industry for many years and, on basis of this, hold a strong position in the global market for shipbuilding and ship repair.

Collaboration is key

The handbook is published by Danish Export - Marine and Danish Export - Cruise & Ferry. These industry networks collectively represent more than 150 leading Danish maritime suppliers and are by far the largest export networks within these industries in Denmark.

For Danish suppliers, partnerships and collaboration are essential to develop successful international projects – we believe that working together is the way to expand business.

We can help you get in touch with the right people and Danish suppliers. You are welcome to contact us for any enquiries.

Company Profile

ABCON AS is a Danish company, specialized in producing and selling mineral & EAL Stop Leak additives and maintenance additives developed for the maritime market.

Presently ABCON has more than 50 specialized products which were developed in close cooperation with some Danish shipping lines.

For years ABCON has been market leader in Stop Leak additives, delivering the products world-wide to more than a hundred vessels a year. The products are non-dangerous, and help vessels avoid untimely dry-dock.

Tank Equipment
Maskinvej 5
DK-2860 Søborg

Company Profile

Turnaround is key in today's shipping industry. To keep business profitable, tight schedules have to be maintained while protecting capacity and the integrity of the cargo. Effective tank cleaning and mud agitation is part of achieving this balance.

Alfa Laval offers fixed and portable tank cleaning solutions as well as agitators for mud tanks.

Supported by more than 60 years of Alfa Laval tank equipment experience, we ensure that you will get not only the right product, but also the optimal configuration and location, taking your tank's design into full account.

C.C.JENSEN A/S

Filter
Løvholmen 13
DK-5700 Svendborg

Company Profile

C.C.JENSEN, the global leader with more than 65 years of experience with offline oil filtration. Designs and manufactures CJC® Oil Filters, Filter Separators and Desorbers for removal of particles, oil degradation products, acidity and water from oils.

With CJC® T²render you get predictive maintenance through online solutions monitoring both oil and equipment conditions.

Our CJC® Filter Inserts remove particles down to below 3 µm, removing even the smallest and most harmful particles. Furthermore, they are made of 100% natural cellulose fibres from sustainable resources, no metal, no plastic, no chemicals.

With CJC® you get:

- reduced wear & failure of components
- prolonged lifetime of oil & equipment
- reduced breakdowns
- reduced maintenance costs
- environmental savings

CJC® Solutions are used for:

- *Lube oil, MGO, MDO fuels:*
Diesel engines
- *Gear oils, biodegradable oils (EAL):*
Thrusters, stern tubes, etc.
- *Hydraulic oils:*
Cranes, winches, cargo pumps, steering gears, HPU's etc.

Pres-Vac Engineering A/S

Svanevang 3-5
DK-3450 Allerød

PART OF G&O MARITIME GROUP ■

Company Profile

For more than 65 years Pres-Vac has been synonymous with the development of high velocity pressure/vacuum valves and venting equipment to the tanker shipping plus offshore industry.

Pres-Vac was established in 1952 and our products offer an unmatched safety record: More than 100,000 valves have been installed without causing any safety incident on a vessel.

Today, the Pres-Vac brand is the world leader in high-velocity pressure/vacuum valves and around 50% of all tanker vessels world-wide use Pres-Vac equipment.

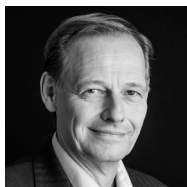

Pres-Vac is part of G&O Maritime Group

Pres-Vac products

We have the widest and most comprehensive range of tank venting equipment and equipment related to the cargo tank such as:

- The worlds' safest and most reliable high-velocity pressure vacuum valve including fully certified breather function and reduced leakage resilient seal.
- Valves with heat tracing in accordance with Rmrs-River and Polar-code requirements.
- A series of Inline pressure/vacuum valves.
- Vertical flame arresters.
- VOCON inline pressure/vacuum valve, actuator controlled, controlling cargo tanks to avoid unnecessary emission of VOC including full MarVoc emission reporting system.
- Special pressure/vacuum valves and detonation arresters for the Inland tanker fleet.
- Air release vacuum breakers designed for firefighting/water systems.
- Air vent heads with certified flame screen.
- Worldwide Service Stations.

All of our equipment is where applicable, fully certified and complying with all existing and known forthcoming rules and regulations inclusive ATEX and CE-PED.

Our High velocity pressure/vacuum valves, flame arresters and detonation arresters are certified for complying with IIB2 cargoes and are certified for use onboard offshore applications.
