Put a face to your supplier from Denmark

Welcome to the 10th edition of the Who is who? handbook – your ultimate guide to the forefront of the maritime industry in Denmark. Gain insight on Danish expertise across various industry segments and let Who is who be your compass to identify key players in Blue Denmark.

Solutions towards more sustainable shipping

When seeking more environmentally conscious and cutting-edge maritime solutions, look no further. As the world's 7th largest maritime nation in export production value, Denmark stands as a beacon of innovation. Danish suppliers possess profound insights into the requirements of shipowners, operators, shipyards, and naval architects. Since the 1990s, Denmark has led the green transition in the maritime sector, pioneering solutions that combine quality, energy efficiency, and reliability. Today, Danish suppliers hold a strong position in the global shipbuilding and ship repair market.

Create connections with precision

This handbook is proudly presented by the Danish Export - Marine and Danish Export - Cruise & Ferry networks, comprising over 130 leading companies in the Danish maritime industry. Empowered by this extensive network, we stand ready to facilitate your connections with the right individuals and navigate you through the diverse landscape of opportunities. Do not hesitate to reach out to us with any inquiries – your gateway to Danish maritime excellence begins right here.

Company Profile

ABCON AS is the leading producer and seller of Stop Leak additives for leaks / water ingress in oil filled systems.

ABCON has 62 specialized products for mineral oil and two types of EAL lubricants for applications such as stern tube, thruster, gear and hydraulic oil systems. The products are delivered worldwide to 100 to 200 vessels every year. The products are non-dangerous and can be shipped on short notice.

ABCON's products are easy to apply, as it can be done by the ship's own crew. ABCON's products help vessels to avoid unplanned dry-docking.

C.C.JENSEN A/S

Oil Filters
Løvholmen 13
DK-5700 Svendborg

Company Profile

C.C.JENSEN, the global leader with more than 70 years of experience with offline oil filtration. Designs and manufactures CJC® Oil Filters, Filter Separators and Desorbers for removal of particles, oil degradation products, acidity and water from oils.

With CJC® T²render you get predictive maintenance through online solutions monitoring both oil and equipment conditions.

Our CJC® Filter Inserts remove particles down to below 3 µm, removing even the smallest and most harmful particles. Furthermore, they are made of 100% natural cellulose fibres from sustainable resources, no metal, no plastic, no chemicals.

With CJC® you get:

- reduced wear & failure of components
- prolonged lifetime of oil & equipment
- reduced breakdowns
- reduced maintenance costs
- reduced energy savings
- environmental savings

CJC® Solutions are used for:

- *Lube oil, MGO, MDO fuels:*
Diesel engines
- *Gear oils, biodegradable oils (EAL):*
Thrusters, stern tubes, etc.
- *Hydraulic oils:*
Cranes, winches, cargo pumps, steering gears, HPU's etc.

DASPOS A/S

Gammel Klaudalsbrovej 495
DK-2730 Herlev

Company Profile

Your challenges

Leakages from broken pipes, valves, gaskets, seals, welding fractures, or the like often occur in high-pressure oil systems. These conditions can lead to pollution, explosion, or fire.

Our solutions

Daspos has developed systems to protect the open engine room against this dangerous situation.

Our system provides the following benefits:

- Individual settings.
- Detection of oil mists and hydrocarbons.
- No human interference.
- High reliability, easy maintenance, and no false alarms!

Emerson - Damcos A/S

Aaderupvej 41
DK-4700 Næstved

Company Profile

Any Ship – Any Task – Anywhere

Improve uptime, increase productivity, and accomplish greater precision and safer conditions with Emerson's marine control and monitoring technologies.

Our systems are designed to ensure that your vessel performs at its optimal capability and that your crew is working under the safest and most reliable conditions.

Experience Emerson's dedication to the marine sector from design and production to application know-how and the global after-sales support.

Valve Remote Control

Hydraulic and electro-hydraulic valve actuation in any conditions.

Cargo Monitoring System & Custody Transfer Monitoring System

Robust radar-based systems for cargo monitoring.

Tank Level Gauging

Pressure and/or electro-pneumatic based tank level systems for all non-cargo tanks.

Fuel Management System

Achieve a highly accurate energy performance baseline with our Fuel Management System

Integrated Control & Monitoring System

A marine automation platform for onboard tank subsystems with control, monitor and alarm functions for operational continuity.

Compensators

Gertsen & Olufsen A/S is a pioneer in maritime vibration control. Our innovative solution removes Main Engine and propeller induced vibrations, saving costs, and enhancing comfort.

Trusted globally, our compensators offer a precise, low-maintenance solution. Easy to install, they bring long-term benefits, ensuring smoother voyages and cost savings, setting new maritime standards.

Bioreactors

G&O develop conventional as well as advanced and chemical free bioreactors that treat wastewater biologically. Our bioreactors make it possible to operate anywhere without harming marine ecosystems with untreated wastewater.

Additionally, we offer other waste handling solutions as vacuum collection, grease separation and sludge handling and a high degree of customization, particularly for the offshore sector.

GreenOil Standard

Erhvervsparken 10
DK-8400 Ebeltøft

Company Profile

Sheep wool is the secret to this innovative approach to oil filtration for all oil types. Replacing the traditional centrifugal separators, the GreenOil systems are recognized as efficient, reliable, and significantly more cost effective.

Filtrating oil improves your oil's lifespan, causes less breakdowns and reduces Co2 emission. Using a GreenOil system your crew additionally gets a better working environment due to the small size and weight of our filters.

Clean oil is truly king.

Howden, a Chart Industries Company

Allegade 6
DK-3000 Helsingør

Company Profile

Howden and parent company Chart Industries are at the forefront of efforts to decarbonize the marine industry through alternative propulsion fuels and innovative emission reduction systems based around the group's compression and cryogenic expertise. Howden Air Lubrication System reduces a ship's fuel consumption by up to 10% net, which significantly reduces costs as well as emissions, and core products such as fans and turbo compressors have been developed to reduce emissions in marine engines. Chart on-board fuel systems and bunkering (refuelling) stations are fundamental to the increasing number of natural gas fuelled ships on global waterways. Today the Chart Industries group are applying their combined expertise developing post combustion carbon capture systems and hydrogen propulsion and refuelling systems for the next generation of clean marine vessels.

Pres-Vac Engineering A/S

Svanevang 3-5
DK-3450 Allerød

PART OF G&O MARITIME GROUP

Company Profile

For more than 65 years Pres-Vac has been synonymous with the development of high velocity pressure/vacuum valves and venting equipment to the tanker shipping plus offshore industry.

Pres-Vac was established in 1952 and our products offer an unmatched safety record: More than 100,000 valves have been installed without causing any safety incident on a vessel.

Today, the Pres-Vac brand is the world leader in high-velocity pressure/vacuum valves and around 50% of all tanker vessels world-wide use Pres-Vac equipment.

Pres-Vac is part of G&O Maritime Group.

Pres-Vac products

We have the widest and most comprehensive range of tank venting equipment and equipment related to the cargo tank such as:

- The world's safest and most reliable high-velocity pressure vacuum valve including fully certified breather function and reduced leakage resident seal.
- Valves with heat tracing in accordance with Rmrs-River and Polar-code requirements.
- A series of Inline pressure/vacuum valves.
- Vertical flame arresters.
- VOCON inline pressure/vacuum valve, actuator controlled, controlling cargo tanks to avoid unnecessary emission of VOC including full MarVoc emission reporting system. IMO/MS/C680
- Special pressure/vacuum valves and detonation arresters for the Inland tanker fleet.
- Special certified high velocity pressure vacuum valves for methanol fuels vessels
- Air release vacuum breakers designed for firefighting/water systems.
- Air vent heads with certified flame screen.

All our equipment is where applicable, fully certified and complies with all existing and known forthcoming rules and regulations including ATEX and CE-PED.

Our high velocity pressure/vacuum valves, flame arresters and detonation arresters are certified for complying with IIB3 cargoes and are certified for use onboard offshore applications.

Company Profile

First class products for diesel- and gas engine control, supervision and starting as well as level detection in water and oil media. Marine and Atex approvals. Distributor for: ComAp a.s , Bedia Motorentechnik, IPU Group and GAC (Governors America Corp.)

Our Product Range Includes:

- Engine and genset control and supervision panels.
- Engine governors and speed pick ups.
- Level sensors without any moving parts.
- Temperatur sensors.
- Hydraulic and air starting systems.
- Springstarters.
- Marine and Atex approvals

Company Profile

Vestas aircoil has designed and manufactured charge air coolers since 1956. The first cooler delivery was for a marine diesel engine. Since then, we have developed into being the preferred partner for bespoke, high performance and reliable engine cooling systems to a wide array of the worlds' largest engine manufacturers. Multiple manufacturing sites, effectively covering the entire globe, allows for a close and efficient collaboration and fast support with all our clients.
